

DIGESTION AID PLUS™

SAFE – NATURAL – EFFECTIVE

The way to better digestive health begins with simple, natural solutions such as **Digestion Aid Plus™**. In a world with a growing population, more chemicals, complicated food labels and mysterious ailments reported and distorted by the media, there is still an easy way to help maximize your digestive performance, safely and effectively.

Dyspepsia, irritable bowel syndrome, constipation and colon cancer

The terms dyspepsia and “irritable bowel syndrome” are often used when there is no underlying and identifiable medical cause to explain certain symptoms. To complicate things further, all digestive problems are aggravated by stress and other lifestyle factors, such as age and a sedentary lifestyle. Diagnosis and treatment can be tricky; the best cure is to take care of your digestive system before problems arise.

- ◆ Dyspepsia has become a catch-all term for a variety of digestive problems, from mild discomfort to bloating, belching, loss of appetite and nausea.
- ◆ Irritable bowel is used more to describe chronic (ever-present or recurring) problems which can include excess and painful gas, intestinal cramping, uncomfortable bowel movements and post-meal abdominal pain.
- ◆ Constipation is an inability to have a bowel movement; it can be quite painful, and if not treated can lead to the more serious problem of obstructed/impacted bowels.

Colon Cancer in Canada¹

- ◆ In 2013, it was estimated that up to 24,000 Canadians would be diagnosed with colorectal cancer, and that over 9,000 of them would die of it.
- ◆ Colorectal cancer is the second leading cause of death from cancer in men and women combined.

“When I prayed for success, I forgot to ask for sound sleep and good digestion.”

- Mason Cooley, American aphorist

A GOOD DIGESTIVE SYSTEM IS CRITICAL TO HEALTH: WHY TAKE CHANCES?

Harmful bowel toxins are more common than most people think, and can make life intensely miserable – in some cases even leading to life-threatening diseases.

WHY GAMBLE WITH YOUR HEALTH WHEN YOU DON'T HAVE TO?

Now Canadians have a simple, all-natural solution:

DIGESTION AID PLUS™
SAFE – NATURAL – EFFECTIVE

- ✓ NEW supplement now available in Canada for adults 18 and older
- ✓ Designed to IMPROVE your digestive and bowel health with 10 medicinal ingredients, including psyllium.
- ✓ Helps PREVENT or alleviate the symptoms of indigestion (dyspepsia), including gas, bloating, irritable bowel, diarrhea, constipation and abdominal pain.
- ✓ One of the best NATURAL food sources for improving your intestinal health, maintaining bowel regularity and to help prevent colon cancer.

Available online and at health food stores and pharmacies throughout Canada.

6 Tips for a Happy Tummy:

1. Take Digestion Aid Plus™ before every meal.
2. When eating, take smaller bites. Put your fork down between bites and chew.
3. Drink more water; constipation is often the result of insufficient water intake.
4. Increase your dietary fiber overall, with not only Digestion Aid Plus, but also with dried fruits (dates, figs, prunes) and other high-fiber food sources.
5. Practice mindful eating: Slowly savour the flavour – be aware of how much is enough.
6. Increase your colon bacterial count with quality yogurt products; look for organic brands that add active cultures after pasteurization.

The healing concept behind this product is simple: You can maintain a healthy digestive system by regularly using an all-natural digestive tonic such as Digestion Aid Plus, which contains plant fiber, bulk, stimulant laxatives and other ingredients to protect the liver and increase bile flow. As part of a healthy lifestyle, Digestion Aid Plus can help ensure good intestinal health for life!

- ✓ Helps promote bowel movements by increasing bulk volume and water content.
- ✓ Provides gentle relief of occasional constipation and/or irregularity.
- ✓ Acts as a stimulant laxative and/or provides additional bulk as necessary.
- ✓ Has protective qualities for a healthier liver.
- ✓ Can relieve digestive disturbances and stomach pain.
- ✓ Acts as a digestive tonic and “bitter” to increase appetite and aid digestive juices.
- ✓ Helps increase bile flow within the gastrointestinal system.

Formulated to help create and maintain a healthy digestive system through regular use, with powerful and proven medicinal ingredients:

Psyllium: With over eight (8) times the bulking power of oat bran, psyllium acts as a gentle bulk-forming laxative and colon cleanser. NOTE: When taken daily, psyllium can also help lower cholesterol by as much as 15%.

Cascara Sagrada: Can help stimulate bowel movements to ensure frequent elimination of waste and other toxins.

Milk Thistle: Protects and supports liver function, relieves symptoms of indigestion.

Blessed Thistle: Acts as a “bitter”, also to improve digestion and relieve symptoms.

Gentian: Helps increase bile flow from the liver.

Black Walnut Hulls: Approved for traditional use in eliminating intestinal parasites.

Marshmallow Root: Contains large sugar molecules called mucilage, which may have a soothing effect on the mucous membranes of the gastrointestinal system. NOTE: Also a treatment for asthma, cystitis and dysentery.

“The Encyclopaedia of Medicinal Plants states that Slippery Elm can bring instant relief from acidity, diarrhea and gastroenteritis, as well as relief from constipation, diverticulitis and irritable bowel syndrome (IBS).”

- Andrew Chevalier, Medical Herbalist

Slippery Elm: From the dried, inner bark of the Slippery Elm tree; recommended for irritable bowel syndrome (IBS), inflammatory bowel diseases (such as Crohn’s disease and ulcerative colitis), gastritis, esophageal reflux (heartburn) and hemorrhoids.

Goldenseal: Helps alleviate infection and inflammatory conditions such as gastritis; can aid digestion and help relieve dyspepsia.

Fenugreek: A digestive tonic that can aid digestion and help relieve dyspepsia and gastritis.

FAQs

What can I expect after taking Digestion Aid Plus?

Initially, you might experience watery, gaseous, black and bad-smelling stools, along with stomach gurgling, mild headaches and some temporary and mild cramps. This is all a normal reaction to a cleansing, while old fecal matter leaves your body.

How do I know if it's working?

As your intestinal tract gets cleansed, your bowel movements will become lighter in color and you should have more frequent, slightly soft, and smoother bowel movements.

Will I lose weight?

Some people have reported weight losses of up to 20 pounds or as little as five pounds; however, this is not a loss of body fat, but a loss of weight due to the elimination of compacted fecal matter in your bowels.

How long should I take it?

After an initial cleanse, there is no reason why you can't continue to take Digestion Aid Plus on a regular basis, with a low-maintenance dosage every other day. There have been studies which indicate that regular cleansing may help prevent related diseases later in life.

Is it habit forming?

No, but your body may get accustomed to the fiber content in Digestion Aid Plus, particularly if you take it continuously at the maximum dosage of nine (9) capsules per day. For this reason, it is recommended that you occasionally lower the dosage and substitute bran or another fiber in your diet.

Will it give me diarrhea?

Diarrhea is almost always due to an infection or virus; Digestion Aid Plus simply absorbs water to soften your stools. It rarely causes diarrhea.

Can I use it with other medications?

Most prescription drugs can be taken safely and without interference; read the label carefully and take your Digestion Aid Plus two hours before or after your prescription drug to avoid any interactions.

What else should I know?

Pregnant or nursing mothers should not take this product without first consulting with a physician. Digestion Aid Plus can be given to children, but parents should check with a doctor first.

DIRECTIONS FOR USE

- ◆ Begin with one (1) capsule with each meal for three (3) capsules per day.
- ◆ Gradually increase dosage to three (3) capsules with each meal for nine (9) capsules per day.
- ◆ After 3-4 weeks at maximum dosage, reduce to a maintenance dosage schedule (e.g., back to 3 per day and then down to 3 capsules every other day).
- ◆ It is highly recommended that dosages be taken with a large glass of water.
